

PROJECT NAME: DIGITAL DETOX

Team Name: SAGESTACK

Team Members: Vanshika Bansal (Leader), Sagar, Abhijeet

Abstract:

This project aims to build a **platform** that helps people achieve **digital balance** by reducing social media overuse and encouraging mindful online habits. The platform guides users through their digital detox journey with engaging challenges, awareness tips, and progress tracking tools.

Each piece of content focuses on productivity and self-improvement — such as study tips, skill-building resources, and time management ideas. To maintain credibility, every contributor must cite authentic **sources** for the information shared.

The platform's simple, distraction-free interface motivates users to use technology more consciously, improving focus, sleep quality, and mental well-being. Ultimately, the project envisions a positive shift where people use screens not out of habit, but with purpose and awareness.
